MOTIF

बालाजीपुरम

BETUL – BALAJIPURAM TEMPLE

Balajipuram temple located to 8 km from main city and it is famous for its design and people faith. This is a place of religious value as well as a picnic spot in Betul. Shri Rukmani Balaji Temple is situated at Betul Bazaar, in Betul District of Madhya Pradesh. This temple, dedicated to Lord Balaji, gives this town a reference name, Balajipuram. The main building of the Shri Rukmani Balaji Temple conforms to the architecture used in south Indian temples. Reputed architects from south India were involved in the design work. Individual sections in the temple resemble smaller temples, enshrining idols of Lord Ganesh, Radha-Krishna, Goddess Durga and Lord Shiva. The main deity is referred by the name Laxmi Narayan.

Situated outside the main building are 3 smaller temples dedicated to Lord Hanuman, Navagraha, and Saint Shirdi Sai Baba. There is an artificial pond named Gangakund, stretching from outside gate to the main building, which contains a total of 10 fountains. Another major attraction is a python shaped structure, which is actually a tunnel leading to all the shrines in the complex.

FOREWORD

The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village and Town and ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1st.phase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and townviz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15th. July, 2013.The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of VillageDirectory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio-gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i)-Status and Growth History of Towns, (ii)- Physical Aspects and Location of Towns, (iii)-Civic and other Amenities, (iv)-Medical Facilities, (v)-Educational, Recreational & Cultural Facilities, (vi)- Industry & Banking, and (vii)- Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Sh. Sachin Sinha, Director of Census Operation, Madhya Pradesh. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl. RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

(C.Chandramouli)

Preface

The District Census Handbook (DCHB) compiled by the Census organization, Government of India is one of the most valuable and useful product of the Census which is brought out for each district in the State having micro level Census and Non Census data . It contains CD Block wise Primary Census Abstract at village/ward level under Census data. The amenities data along with additional information regarding area, population, civic status, land use etc. for every village/town is covered under Non Census data. This publication started from the 1951 Census, but prior to this, a similar publication was released in the earlier censuses. Those publications contained only village statistics, village names and total population. The 1951 Census could, therefore be said to represent a significant step forward, in the process of making detailed census statistics available down to the village level. An important achievement, for the first time in 1991 Census, was that the village level data was presented Community Development Blockwise.

The scope of District Census Handbook has undergone considerable change since 1951. This is basically due to the growing demand for more information. To make the basic statistics available to the data users, as early as possible, the District Census Handbook of 1991 was brought out in a single volume as against the earlier practice of bringing it out in two parts. The volume was however divided in two parts viz. part A and part B. Part A contained the Village/Town Directory while part B contained the Primary Census Data. Continuing the practice of 1991 Census, the 2001 series of the District Census Handbooks also comprised of two parts. However the present DCHB is prepared in two separate volumes. Volume II contains the Primary Census Abstract and Volume I contains the village/town directory of the District.

Volume II of the District Census Handbook contains Village and Town Primary Census Abstract. This provides information on area, occupied residential houses, number of households, sex-wise total population. child population in age-group 0-6, Scheduled Castes and Scheduled Tribes, literates, workers, non-workers and classification of workers into four broad categories i.e. cultivators, agricultural labourers, workers in household industries and other workers in respect of each village and town of the district. Besides the brief history and other major characteristics of the district, inset tables and appendixes based on Houselisting and PCA alongwith analysis in the District Census Handbook provide glimpse of availability of amenities to villages relating to housing, assets available with households and demographic profile of population at tahsil/ C.D block level which are helpful for rural planning.

Volume I contains Village Directory which provides information on infrastructure amenities and land use data at village level i.e. name and location of villages, area, population, number of households, important civic amenities/facilities available in villages like educational, medical, drinking water, drainage, post, telegraph, public call office, mobile coverage, internet cafe, private courier service, commercial and co-operative banks, agricultural and non-agricultural credit societies, recreational and cultural facilities, communications, approach to the village, nearest town and its distance and power supply. Similarly, the comprehensive statements and their analysis of Town Directory provide valuable information on growth, physical, economic, civic and development aspects in respect of each town of the district. C.D.

block being the lowest administrative unit for developmental planning, it is assumed that the data provided at this level would be extremely useful to the planners for formulating micro level development plans.

It may be noted that the village wise area figures presented in the PCA are based on village information as furnished by the revenue authority and the "total area" given for the community development blocks, is the sum total of the area figures of all villages coming under it. The "total area" of tahsil is based on the information furnished by the Commissioner, Land Records, Government of Madhya Pradesh, Gwalior. In some cases the total area shown against the tahsil, may not tally with the total of the area figures of villages coming under it.

The design of 2011 District Census Handbook has been evolved centrally by the Census Commissioner, India and accordingly these books have been prepared by my office. In earlier censuses and until 1991, the cost of publication of these books were borne by the State Government but since 2001 these are being printed centrally by the Census organization. In accomplishing this task we have had the whole hearted cooperation of the staff at various levels of different departments of the State Government. The data supplied by the field level officers have been comparatively checked with 2001 DCHB information and have been cross checked with the data obtained from various departments. An attempt had been made to reconcile the discrepancies by external validation to make it more reliable. I am grateful to all heads of departments of the State Government, officers and staff engaged in the conduct of 2011 Census for their cooperation to accomplish this task.

The compilation of such a huge amount of varied data requires proper planning and close monitoring. We had the honour of having enlightened guidance and encouragement of Dr. C. Chandramouli, IAS, Registrar General and Census Commissioner of India.

The data presented in the District Census Handbook required a concerted team work of officers and staff member of this Directorate who were involved with it at various stages of its planning, supervision, field work, computerisation, preparation of manuscript, maps and printing. I express my appreciation for the painstaking dedicated service rendered by all of them and also to the officers and staff of Data Centre, Bhopal for their untiring cooperation in finalizing the 2011 Census Data.

I shall feel greatly rewarded if the book comes to the expectation of the data users.

Sachin Sinha

HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, news papers & magazines and 'most important commodity' manufactured in a village in addition to prescribed facilities of earlier censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.:(i)-Status and Growth History of towns,(ii)-Physical Aspects and Location of Towns,(iii)-Civic and other Amenities,(iv)-Medical Facilities,(v)-Educational, Recreational & Cultural Facilities,(vi)-Industry & Banking, and (vii)-Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

BRIEF HISTORY OF THE DISTRICT

The district derives its name from the small town of Betul Bazar about 5 km south of Badnur, the Headquarters of the district. During the Maratha regime also, in the beginning of the British rule, Betul or Betul Bazar was the district Headquarters. In 1822 the District Headquarters was shifted to the present place, then only the village came to be known as Badnur Dhana, meaning Badnur village in the local dialect. Now, even after such a long time, not only the district retains the old name, but the name of the new Headquarters town, Badnur, as also been superimposed by "BETUL".

Betul was a district in the earstwhile state of Madhya Pradesh and continues as such in the new state of Madhya Pradesh which came into being on 1st Nov. 1956. The early history of the district is shrouded in the veil of obscurity. The earliest available inscriptional evidence takes us upto the year 631. A.D. only. This latter inscriptional evidence refers to the grant of lands in villages Tivere kheta (identified by Raibahadur Hiralal with village Tiwarkhed where the copper plates bearing the inscription were found) and Ghuikheta (unidentified) on the bank of the Ambeviaraka nada (identified with Ambhora river) by King Nannaraja of the well known Rashtrakuta dynasty whose capital was at Malkhed. According to Dr. Hiralal, the record established once for all that the Rashtrakufas dominated the Multai plateau, as the Multai plates themselves contained names of villages and places which were not identified. The supremacy of the Rashtrakutas of Malkhed lasted from 75 to 950 A.D. The states of the remaining portion of the territories now comprised in the district is not known, though it is likely that it might nominally have been under the sovereignty of the kings of Malwa who rules from Dhar.

Except to the extent stated above, the history of the district is again clouded in oblivion, till we find a mention of it in the Marathi religious work 'Vivek Sindhu', written by Mukund Raj Swamy who lived about the end of 13th century. The work refers to the name of Jaitpal, who was the king of Kherla near Betul, under whose patronage Mukund Raj passed the last years of his life. According to Vivek Sindhu, Jaipal was the last member of a Rajput dynasty, which has ruled in Kherla. Tradition has woven stories describing Mukundraj as having possessed miraculous powers, and that soon after his death, Kherla was besieged by General Rahman Shah Dullah of a Muhammadan king of Delhi in revenge for the death of a fakir at the hands of Jaitpal. Tradition further has it that the Raja of Kherla yielded only after a long siege of twelve year; that the victorious Mohammadan General cut off his head and offered it to the Devi for victory and that his headless corpse thereafter pushed the enemies beyond the banks of Tapti. This tradition apparently has been woven to account for the fact that whereas the head of the said Rahman Shah Dullah lies buried in village Umri, immediately below Kherla, his body was buried at Ellichpur in Berar. According to the Gazetteer, the local story really relates to the last Bahmani invasion of Kherla in 1467, when the victorious Nizamul Mulk of the Bahmani King was slain by two

Rajputs. Kherla fort, as ascertained from an inscription on a stone on its eastern wall, is not older than 1363 A.D. The stone on which the inscription is recorded originally belonged to a vapi (step-well) and the date 1363 A.D. is the date of construction of the step-well to the north of Khetakpura, which Dr. Hiralal thinks was the old name of Kherla. The fort cannot be later than 1398 A.D. because in that year the existence of the fort is attested to by records of historian Farishta.

Farishta mentions one Narsingh Rai, King of Kherla, as a man of great wealth and power, being possessed of the hills of Gondwana and other countries. Farishta does not give any information regarding the race of this king, though he is usually believed to be Gond. Jaitpal, to whose dynasty he apparently belonged, is spoken of as a Rajput. The Gazetteer, therefore, suggests that Kherla, like Garha-Mandla, was ruled by a dynasty of Gond-Rajputs (or Rajgonds). In 1398, Narsinghrai invaded Berar, then under Bahmani kingdom, under inducement from the Mohammadan kings of Malwa and Khandesh, who according to Farishta were jealous of Kherla power and wanted its destruction. Owing to the pre-occupation of Bahmani King Firoz Shah in battles with Vijaynagar King, Narsinghrai met with some initial successes, but was finally defeated, and became a tributary of the Bahmani kingdom. After this, till about 1425, Kherla kingdom continued to rule in peace. But about 1425, Kherla King Narsingh Rai incurred the wrath of Hushangshah of Malwa, as he refused to help Hushangshah against Ahmadshah Bahmani. The enraged Hushangshah, therefore, attacked Kherla twice, but was repulsed. In the third attack in 1426, however, Narsinghrai had to petition to Ahmadshah Bahmani for aid. Hushangshah was repulsed this time also, but with Bahmani aid. In 1433, taking advantage of Ahmadshah's pre-occupation in war with Gujrat, Hushangshah again attacked Kherla and slew Narsinghrai. The Farukhi ruler of Khandesh intervened and brought rapprochement between Hushangshah Ghorī and Ahmadshah Bahmani, under the stipulation that the fort of Kherla and the territory it commanded would belong to Malwa while Berar should continue to be in possession of Bahmanis. Thus ended the dynasty of the Rajput or Rajgond rulers of Kherla, which now became a part of the Malwa kingdom.

In 1467, Kherla was the scene of yet another battle between the Bahmani and Malwa kings, when Mohammadshah Bahmani commanded Nizam-ul-Mulk (Governor) of Berar to attack Kherla. The later was ultimately successful in capturing the fort. but was deceitfully slain by two Rajput soldiers of Kherla. The Kherla territory was however, restored to Malwa as a result of negotiations between the two sides, and lasting peace then ensued. Under Malwa Kings, Kherla territory used to be in charge of a Mohammadan Governor stationed locally. The territories of the Multai plateau were probably in charge of local chiefs, as suggested by copper plates found (now lost) at village Banur in Multai tahsil.

Malwa was occupied by Akbar in 1560, and about 1596, Kherla is shown as included in the newly constituted Moghal subah of Berar. Kherla itself was the

headquarters of a sarkar or district, which included central and the southern portions of Betul district and some tracts of Chhindwara.

On the decline of the Moghal empire, the Kherla sarkar was annexed, by the Gond ruler Bakht Buland of Deogarh. Subsequently, along with other Deogarh territory, Kherla passed on to Raghuji Bhonsla of Nagpur in 1743. The Marathas shifted the capital from Kherla to Betul and the fort at Kherla was destroyed. The district continued to be in possession of the Bhonsla ruler till 1818, when the district, along with the Bhonsla territories, south of Narbada was made over to the British after the battle of Sitabaldi. After the escape of Appa Sahib, the deposed Bhonsla ruler, from the custody of the British while he was being taken to Allahabad, the district witnessed actions between the supporters of Appa Sahib and the British detachments stationed at Betul. These lasted till July 1818. Betul district formally became part of the British dominions in 1826 under a treaty.

During the 1857 mutiny, the district did not witness any disturbance worth mentioning. After the mutiny, the administration of the district along with the rest of the country passed into the hands of the British Crown which continued till, in 1947, the British granted independence to the country.

ADMINISTRATIVE SETUP

Betul district lies in the extreme south of the Narmdapuram division. The district comprises of eight tahsils and ten community development blocks, which are Betul, Multai, Athner, Prabhat Pattam, Chicholi, Ghoda Dongri, Amla, Bhainsdehi, Bhimpur and Shahpur. The ten towns in the district are Bhainsdehi (NP), Athner (NP), Betul (M), Betul Bazaar (NP), Chicholi (NP), Sarni (M), Ghoda Dongri Ryt (CT), Dhodaramohar Alias Bhoura (CT), Multai (NP) and Amla (M). There are 1399 villages, out of which 1344 inhabited villages and 55 uninhabited villages in the district according to Census 2011. Athner tahsil was created on 16.05.2008 from Bhainsdehi tahsil. Ghoda Dongri and Chicholi tahsils were created from Betul tahsil on 16.05.2008 and 24.07.2008.

Tahsilwise number of villages and towns according to Census 2011 are below:

TAHSIL WISE NUMBER OF VILLAGES AND TOWNS	NUMBER OF VILLAGES			NO. OF TOWNS		
	TOTAL	INHABITED	UN- INHABITED	STATUTORY TOWN	CENSUS TOWN	TOTAL TOWN
1	2	3	4	5	6	7
Bhainsdehi	297	286	11	1		1
Athner	101	98	3	1		1
Betul	193	189	4	2		2
Chicholi	80	79	1	1		1

The district is the basic territorial unit of administration in the state as well as in India. The Collector, as the head of the district administration is the lay functionary of the Government, having vast powers and wide responsibilities. In many ways he is the link between the state Government and the people. He is the custodian of law and order and the pivot of local administration.

The collector is the chief executive officer of the district and as such he exercises general supervision over various departments in regard to their non-technical work. Co-ordination of the activities of various Departments, controls over local-self governing bodies, execution of Government schemes and miscellaneous functions, such as Panchayats, Census, election and relief measures in time of emergencies like floods, famine and epidemics, etc. also come within his preview.

The narrative on the organisational set-up of the collectorate may be divided into three main functionaries viz.(i) land revenue, land-records including consolidation of land and other allied matters. (ii) law and order and (iii) Development.

The Collector is assisted by deputy Collectors, tahsildars, naib tahsildars, revenue inspectors and patwaris. The Collector is also associated with a number of other committees in the district. The most important among them is the District Advisory Committee. The Collector is also vested with statutory powers under excise act to implement the excise and prohibition policy of the Government. Superintendent of Police is the head of police department at the district headquarters, In order to facilitate proper and smooth functioning of Judiciary and administration there are 17 police station and 7 police out posts in the district.

The Judiciary is independent. At the district level, there is district court headed by District and Session Judge. District and Session Judge is assisted by Civil Judges who are posted at lower courts.

DISTRICT HIGHLIGHTS - 2011 CENSUS

- The district occupies 17th place in the state according to population.
- The district occupies 4th rank in the state in terms of area having 10,043 sq.km. which is 3.25 percent of the total area of state.
- Literacy rate of Betul district is 68.9 percent and it occupies 27th position in the state. The female literacy rate of the district is 60.9 percent.
- Density wise the rank of the district is 47th in the state.
- Ranking of the district according to the sex-ratio is 10th in the state.
- Female work participation of the district is 42.9 percent of total female population. Rank of the district according to female work participation is 6th in the state.
- Population wise largest village is Prabhat Pattam of Multai tahsil L.C.No. 486272 with 7704 population and smallest village is Khapa of Multai tahsil L.C.No.486354 with population of only 1 person.
- Population wise largest town is Betul (M) having population 103330 and smallest is Dhodaramohar Alias Bhoura (CT) with 5956 population.
- Economy of the district is mainly dependent on agriculture and the district is famous for Satpura Thermal Power Plant, Sarni.

Section - I

Primary Census Abstract (PCA)

Brief Note on Primary Census Abstract

Introduction:

The Indian Census has the reputation of being one of the best in the world. The first Census in India was conducted in the year 1872. This was conducted at different points of time in different parts of the country. In 1881 a Census was taken for the entire country simultaneously. Since then, Census has been conducted every ten years, without a break. Thus, the Census of India 2011 was the fifteenth in this unbroken series since 1872, the seventh after independence and the second census of the third millennium and twenty first century. The census has been uninterruptedly continued despite of several adversities like wars, epidemics, natural calamities, political unrest, etc.

The Census of India is conducted under the provisions of the Census Act 1948 and the Census Rules, 1990. In Censuses until 1931, a synchronous de-facto method was adopted wherein the Census was conducted throughout the country on a single night. This being a very costly affair and involved the deployment of very large force at one point of time was given up in 1941. Since then the same methodology has been followed in all the Censuses. It is a gigantic operation and considered to be the single largest, complex, peace time administrative exercise in the world.

The Census Operation in India is carried out in two distinct but inter connected phases - the House listing and Housing Census followed by the Population Enumeration. During the first phase of Census 2011 i.e., House listing and Housing Census, the buildings, census houses and households were identified and systematically listed in the House Listing and Housing Census Schedule during the period April to September, 2010 in different States/Union Territories. Apart from listing of houses, some useful data on the amenities available to the households was also collected for assessing condition of human settlements, housing deficits etc.

Censuses prior to Census 2001 had the system of collecting the information through Individual Slip which was a key schedule for every individual. The information collected through slip was then compiled for a household. Some information was also collected in addition to this for the household. During 2001 Census a comprehensive Household Schedule was adopted replacing the individual slip concept. In 2011 Census also similar household schedule was used for canvassing. The scope of demographic, socio-economic parameters has been widened in every census.

2. Population Enumeration - Census 2011:

The field work of the second phase i.e. Population Enumeration was carried out during February-March, 2011. One of the essential features of Population Enumeration in the second phase was that each person was enumerated and her/his individual particulars were collected at a well-defined point of time.

The Census moment and the reference date for the Census of India 2011 was 00:00 hours of 1st March, 2011. The enumeration was conducted from 9th February to 28th February, 2011 along with a revisional round from 1st March, 2011 to 5th March, 2011 synchronously all over the country except for few specific areas of the Jammu & Kashmir, Himachal Pradesh and Uttarakhand states that remain snowbound in February. In these locations the population enumeration was done from 11th September, 2010 to 30th September, 2010 along with a revisional round from 1st October, 2010 to 5th October, 2010. The reference date for the census in snow bound non-synchronous areas of these states was 00.00 hours of the first day of October, 2010. In addition to the coverage during House listing & Housing Census, the enumeration of the Houseless population was carried out on the night of 28th February, 2011, as has been the usual practice. For the purpose of Census, certain areas where the access of the civilian enumerators was not permissible due to security reasons termed as 'Special Charges' such as the Defence and strictly Military/Para-Military areas, including operational areas were also covered. Such areas were not covered during the House listing & Housing Census. In addition to the defence/para-military areas, Special Charges also included certain factory areas, certain colonies, sensitive areas, scientific establishments, etc. These also formed Special Charges as these were not accessible by the usual census enumerator.

3. Quality Assurance:

A Task Force for Quality Assurance (TFQA) functioned under the chairmanship of the RG & CCI. Experienced officers of the different divisions of the organization i.e. Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division comprised the TFQA. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The main objective of constituting the TFQA was to subject the data to stringent validation checks and ensure its quality before release as it was expedient to be satisfied itself about the quality of data before putting the same in public domain.

The Directors and their senior officers were involved at all levels with respect to the quality and the coverage of their states/Uts. The TFQA intensively scrutinized coverage and content parameters including edit and imputation logic. The most important aspect of the data quality was to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, especially for small area population statistics. The content was scrutinized mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if

available, from external sources. Quite often the local knowledge and perception was looked at to understand both the existing and the new emerging trends of population distribution and characteristics. A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2011 Population Enumeration results and finally clear them for use. The population data was cleared only after the full possible satisfaction of the TFOA.

The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

4. Primary Census Abstract:

The Primary Census Abstract which is important publication of 2011 Census gives basic information on Area, Total Number of Households, Total Population, Scheduled Castes, Scheduled Tribes Population, Population in the age group 0-6, Literates, Main Workers and Marginal Workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and also Non-Workers. The characteristics of the Total Population include Scheduled Castes, Scheduled Tribes, Institutional and Houseless Population and are presented by sex and rural-urban residence.

In 1981 census main workers were presented into four categories. As regards 1991 Census, the nine-fold industrial classification of main workers has been given in the Primary Census Abstract. One of the important features of the Primary Census Abstract of 1991 Census was the presentation of population of the age group 0-6 which is continued in 2001 and 2011 Census. All the children of age 6 years or less have been treated as illiterate even if the child is going to a school and may have picked up reading and writing. This will help the data users in better analysis and understanding of the literacy data as the literacy rate is calculated with 7 years and above population and it is referred as effective literacy rate. In 2001 and 2011 census four categories of main workers have been given in the Primary Census Abstract.

5. Level of Presentation of PCA data in District Census Handbooks:

The format of Primary Census Abstract (PCA) adopted in the DCHB of 2001 Census has been continued for 2011 Census as the data on four categories of works have been presented similar to 2001 census. The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts in DCHB is as under:

1. District Primary Census Abstract -District/C.D. Block/Town.
2. Primary Census Abstract for Scheduled Castes- District/C.D. Block/Town.
3. Primary Census Abstract for Scheduled Tribes -District/C.D. Block/Town.
4. Village Primary Census Abstract -C.D. Block/Village wise.
5. Urban Primary Census Abstract- Town/Ward level.

The PCA Data for villages was presented C.D. Block wise for the first time in 1991 Census. This practice is continued in 2001 and 2011 Census. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

6. Area Figures:

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the C.D. Block are the total of the village areas coming under each C.D. Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level.

District Primary Census Abstract
